

CYCLECRAFT

Parent Guidelines

Llywodreth Cynulliad Cymru
Welsh Assembly Government

CYCLECRAFT is a Road Safety cycle scheme for children aged 10-11 years, which aims to train on the road rather than lessons in the school playground.

The Skills taught by Cyclecraft Training are:

1. Cycle Maintenance
2. Balance & Control
3. Stopping normally and in an emergency
4. Observations
5. Turning Left and Right
6. Overtaking parked vehicles

Cyclecraft

How will it help my child?

It will:

- Teach children where to position themselves on the road and to be aware of other road users.
- Help them to recognise dangers while cycling on the road.
- Improve their road sense.
- Promote your child's social development, independence and sense of responsibility.
- Develop their skills, when cycling on the road.

Benefits of Cycle Training

On road training has been proven as one of the most effective ways of raising children's awareness of cycling while on the road.

The scheme aims to improve contact between parents and the school.

Cyclecraft Training aims to develop a community approach by educating local parents to address children's vulnerability when cycling on the road.

Cyclecraft

Warning — Training

Cyclecraft training builds on skills developed during practical training sessions.

Cyclecraft Training clearly states throughout the training that its aim is to develop skills for the long term.

Cyclecraft Training reinforces that an adult should **ALWAYS** accompany young children when cycling on the road.
